

# Lab: Azure Network Services

**Student Name:** Vivek Vashisht

**Student ID:** 000907246

## Screenshots

- Two networks and the ability to ping between them

The screenshot shows the Azure portal interface for Virtual networks. The page title is "Virtual networks" and the breadcrumb is "Home > Virtual networks". Below the title, there are options to "Create", "Manage view", "Refresh", "Export to CSV", "Open query", and "Assign tags". A filter bar shows "Subscription equals all", "Resource group equals all", and "Location equals all". The table below shows two records:

Name	Resource group	Location	Subscription
THServer-vnet	ANSRG1	Canada Central	Azure subscription 1
THServer2	ANSRG1	Canada East	Azure subscription 1

At the bottom, there are navigation links: "< Previous", "Page 1 of 1", and "Next >". A "Give feedback" link is also present.

## - Peered networks

The screenshot shows the 'Peering' configuration page for the virtual network 'Canada\_Central\_to\_Canada\_East'. The page is titled 'Canada\_Central\_to\_Canada\_East' and 'TNServer-vnet'. It provides a summary of the remote virtual network and the local virtual network, along with the peering settings.

**Remote virtual network summary**

- Remote Vnet Id: /subscriptions/ee9ea131-d6f1-4e0b-baee-b2936156b5ae/resourceGroups/A...
- IP address space: 10.1.0.0/16

**Local virtual network summary**

- Peering link name: Canada\_Central\_to\_Canada\_East
- Peering state: ✔ Connected

**Local virtual network peering settings**

- Allow 'TNServer-vnet' to access TNServer2: ☒
- Allow 'TNServer-vnet' to receive forwarded traffic from 'TNServer2': ☒

Buttons: Save, Cancel

The screenshot shows the 'Peering' page for the virtual network 'TNServer-vnet'. It displays a list of peerings, including the one to 'Canada\_Central\_to\_Canada\_East'. The page includes a search bar, a list of actions (Add, Refresh, Export to CSV, Delete, Sync), and a table of peerings.

**Virtual network peerings**

Name	Peering sync status	Peering state	Remote virtual network	Virtual network
Canada_Central_to_Canada_East	Fully Synchronized	Connected	TNServer2	Disabled

TNServer2

Virtual network peering enables you to seamlessly connect two or more virtual networks in Azure. This will allow resources in either virtual network to directly connect and communicate with resources in the peered virtual network.
